To Whom It May Concern,

I highly recommend Ghaleb Saidi, who successfully completed our 11-week AI Product Management Bootcamp and led the design of MyHandyAI. He demonstrated exceptional design skills, technical acumen, and collaborative leadership across the entire product development cycle.

During the program, Ghaleb:

- Led end-to-end UX design for an AI-powered home repair assistant
- Conducted comprehensive user research and created data-driven design solutions
- Designed complex conversation flows and AI feedback mechanisms
- Collaborated effectively with cross-functional teams of 8+ members
- Delivered implementation-ready wireframes and design documentation
- Successfully transitioned from computer science background to UX design leadership

His unique combination of technical knowledge and design thinking makes him particularly valuable for AI product development teams. Ghaleb would be an excellent addition to any organization seeking a skilled UX designer with startup experience.

Sincerely,

*Dr. Nancy Li*
